Class Progress
Learner Analytics for your Module

Introduction

The Class Progress tool tracks your learners' overall progress as a module and individually. You may want to use the Class Progress tool to do any of the following:

- Monitor progress for any or all users in your module and prepare progress reports;'
- View user profiles, email users, or instant message users;
- Track when a user accesses the module and downloads module content;
- Track grades, completion of learning objectives, access of content topics, participation in discussions, assignment submissions, quiz submissions, checklist completion, survey responses, and logins
- Set up intelligent Agents for learners who are falling behind in a module
- View feedback and submissions for assignments, discussions and other individual assessments.

For content, the content must meet three criteria to be included in the learner's progress [1] the learner must have access to the content, [2] the content must be marked with a completion method of Required Automatic or Required Manual and [3] the content is not exempt. When content does not meet these conditions, it is not included in the calculation of the learner's progress.

An Overview of Class Progress

From the navbar, click Class Progress.

[1] You can filter class participants based on membership in groups or sections.

[2] Use the Class Progress navbar to sort the order in which users appear in the chart. By default, the following performance indicators appear from left to right in the navbar: Content Completed, Objectives, Logins, and Grades. A maximum of 4 performance indicators can display at any time on the Class Progress page. Available indicators include: Content Completed, Objectives, Assignment Submissions, Grades, Checklist Completion, Content Visited, Discussion Participation, Login History, Quiz Performance, and Survey completion. To change which indicators are displayed and which order they are displayed in, click Settings.

[3] All enrolled module participants appear in the chart. Their name, username, and Org Defined ID display alongside their profile picture, if supplied. Their performance results for the listed indicators also display in the chart. Clicking on any area of this chart brings you to the individual user's User Progress page.

[4] To adjust which performance indicators display by default, click Settings. You can also search for users by typing in the Search users field.

Four Indicators of Progress

Each module can select four indicators of progress for which they can use to monitor how students are performing in their class. These progress indicators can be easily changed or reordered. Each indicator has a visualization to highlight overall progress, recent activity, and calls attention to areas of concern, so instructors can develop plans for getting students on track.

Instructors can hover over a visualization to get more details. Clicking an indicator allows instructors to drill into the details of tool progress for the user in the module, and is an entry point into User Progress where they can look at summaries and details of tools, navigating between users and modules if they have permission.

Available Indicators include:

- Content
- Objectives
- Grades
- Login History
- Discussions

- Surveys
- Assignment
- Quizzes
- Checklist

Indicators in Detail

Checklist
Displays how far the learner has progressed through the checklists in the module. Items due within the next 7 days are highlighted and represents where they could be.

Discussions
Presents the key indicators of engagement for each user across all discussions, including the number of messages the student has read, the number of new posts the user has made, and the number of replies the user has made to other messages.

87 read   **65** posts   **32** replies

Login History
Displays the number of logins to the system each day and summed as a total. Hovering over each bar provides details of each.
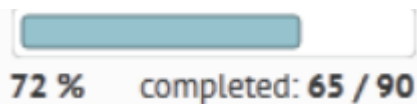

Date: **8/14/2012**
Sessions: **12**

logins: **104**

Surveys
Displays how far the learner has progressed through the assigned surveys in the module.
72 %   completed: **65 / 90**

Objectives
Illustrates how each student is progressing through the objectives assigned. The focus is on both completed objectives and objectives needing remediation.

2 failed   completed: **7/50**

Content
Displays how far the learner has progressed through the content in the module. Items made available to be user to view is highlighted and represents what they should be able to view based on the desired pace.

77 %   completed: **54 / 70**

Grades
Presents the current final grade as well as a visualization of the scores of the last 15 items. Hovering over each bar provides details of each column, including grade item name and score.

Item: **Sample Grade Item**
Score: **98**

81 %

Assignments
Presents the current average on all assignments as well as a visualization of the scores of the last 15 items. Hovering over each bar provides details of each column, including the assignment name and score.

Item: **Sample Assignment**
Score: **90**

79 %

Quizzes
Presents the current average on all quizzes as well as a visualization of the scores of the last 15 items. Hovering over each bar provides details of each column including the quiz name and score.

Item: **Sample Quiz**
Score: **83**

91 %

View Progress against Learning Outcomes

To view a learner's progress against learning outcomes in a module, the Class Progress tool includes a Standards tab. This tab displays a history of the learner's submissions and assessments against all learning outcomes aligned to activities in the module.

For instructors, this enables them to:

- View all the learning outcomes that are aligned to assessment activities in the module, so that they can understand the learning outcomes that their learners are expected to demonstrate.
- View each learner's current assessment against each learning outcome, so that they can alter or individualize instruction, based on the learner's performance.
- View a list of all the evidence that has been assessed for a specific learning outcome, so that they can quickly familiarize themselves with feedback they provided for assessments.

For learners, this enables them to:

- View all the learning outcomes that are aligned to activities in the module, so that they can understand all the learning outcomes they are expected to demonstrate in the module.
- View their current assessment against each outcome, so that they can understand their progress against each learning outcome.
- View a list of all the feedback their instructor has provided for a specific learning outcome, so that they can understand where they might need to make more effort.
- Note: If an instructor has offered feedback for a hidden rubric, that feedback appears in the Grades or Assignments tool. The rubric criterion title and description appear above each feedback item.
- If the organization has provided the ability for learners to view outcomes aligned with quizzes, learners can see if more than one attempt was made, and the results for each attempt.

To view progress against learning outcomes, you need to do one of the following: If you are an instructor, navigate to Class Progress and select a learner to view. If you are a learner, navigate to User Progress. Click Standards. The overview for the module lists all the learning outcomes that are aligned to activities in the module, with a mini-visualization of the last few assessments made for the learner against each learning outcome.

.

Click a learning outcome to display learner-submitted evidence related to the selected learning outcome. It also displays a timeline showing the comparative evaluation levels for each evidence item and a summary of feedback given on each activity. The Trend section displays a trend visualization of assessments. The Evidence section displays a list of all the activities that have been assessed.

Change and reorder Main Indicators in Class Progress

To modify the main indicators in Class Progress:

1. On the module navbar, click **Class Progress**.

2. On the **Class Progress** page, click **Settings**.

3. From the drop-down menu of the indicator you want to replace, select **Replace**.

4. In the **Select Progress Indicator** dialog box, click on the indicator that you want to use as a replacement. To replace additional progress indicators, repeat the previous steps.

5. From the drop-down menu of a progress indicator, select **Move Up** or **Move Down** to rearrange the order that it appears in Class Progress.

Watch this short video guide for more details on setting up your class progress display.
