2024-25 Module Shells

We have received multiple queries regarding the number of modules that are being presented to you in Brightspace in the "2024-25" tab.

The modules you are seeing under the "2024-25" tab are based on the modules you were linked to in Banner as of mid-July 2024, and which had student enrolments in Banner in the last academic year.

What appears to be multiple copies of a particular module are unique empty course shells that are created based on the Module code, CRN, TU Dublin program code and the year of study.

A single module cannot be attached to two CRN's.

As you are aware Faculty Grade Entry lists all of the CRN's you are linked to https://ssb-ta.tudublin.ie/FacultySelfService/ssb/facultyCommonDashboard

You can use FGE to identify each empty shell in Brightspace based on its unique Module Code.

The Module Code is accessible by Selecting Module Tools -> Module Admin -> Module Information

To clearly identify each module to your students we suggest you modify the Module banner and add a description.

Modify Module Banner

To clearly identify each module to your students we suggest you modify the Module

name within the banner. You may also choose to change the Banner image.

Add Module Description

You can also add a description.

Module Tools -> Module Admin -> Module Information

Identifying the Module to your students

When providing information to your students to enrol please provide them with the appropriate module code of the shell you have chosen to use.

How do you reduce the number of modules you are enrolled on or how do you request a new module?

Please read the following FAQ's guides within our VLE microsite

• I have multiple versions of the same module under the "2024-25" tab. What should I do?

• How do I unenroll myself (and manually enrol / unenroll other users) from my Brightspace module?

• I am missing modules under the "2024-25" tab, what should I do?

Sincerely

eltat
